GROWTOPIA · CARNEYS POINT

Frosted Nug Product Vault · QR shelf labels

35 labels. Each one opens the 3D walkthrough at that unit: vault.growtopiainc.com/walk/

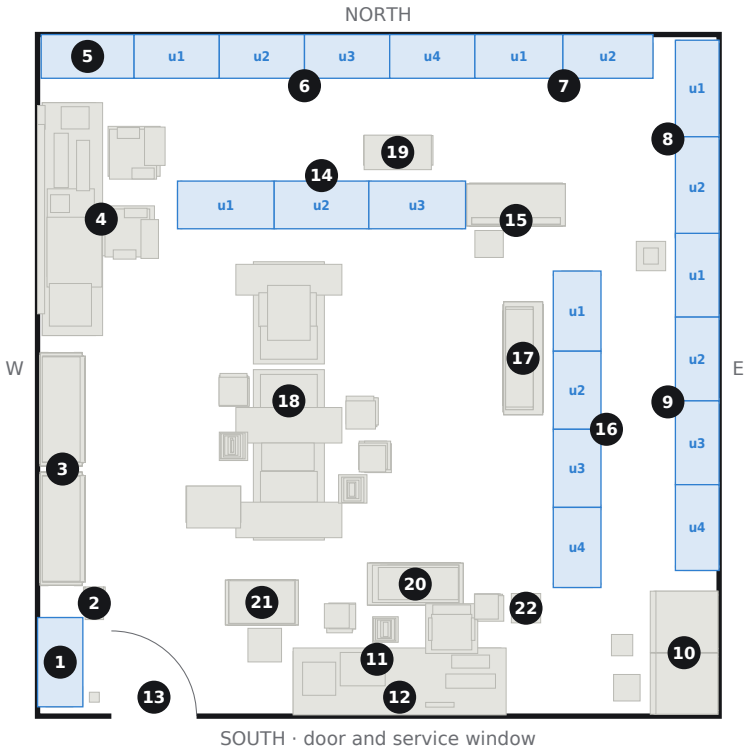

1 Print Print pages 2 and 3 at 100% (Actual size, not "Fit to page") on Letter label stock or card. Each label is 2.5 x 1.5 in.

2 Cut Cut on the crop marks in the margins. The grey crosses mark inner corners and are cut away.

3 Match The big number is the fixture number on the plan below; UNIT n/m is the unit within that run, counted from the run's start (blue boxes, u1, u2 ...).

4 Stick Put each label on the unit's LEFT post as you face the unit from the aisle, at eye level (about 5 ft / 60 in to the label's centre). Fixtures with no units (racks, desks, coolers) take one label on the left side of the front, also at eye level.

5 Check Scan a few with a phone camera before sticking all of them; each should open the 3D view at that unit.
